
DA12 Tri-chamber Airless Skin Care Packaging Supplier

Cylindrical Design | Humanised Grip Experience

DA12 adopts a smooth cylindrical bottle design with a simple and elegant appearance, ergonomic and comfortable to hold. Compared with the traditional double-barrelled bottle, it is more suitable for users' daily use habits, reflecting the brand's care for details.

Dual-compartment structure | Multi-functional synergistic application scenarios

The left-right symmetrical double-compartment structure of the inner liner is suitable for combinations such as anti-aging + whitening, day + night, essence + lotion, etc. It ensures that the two active ingredients are stored independently, avoiding oxidation and contamination, and achieving synergy of the two formulas at the moment of use.

Multi-size options for flexible matching

It provides three combinations of 5+5ml, 10+10ml and 15+15ml, with a uniform outer diameter of 45.2mm and heights of 90.7mm / 121.7mm / 145.6mm, which are suitable for different product

positioning, from trial packs to retail packs.

High-quality materials | Stable and durable without leakage

Pump head: PP material, compact structure, smooth pressing.

Outer bottle: AS or PETG material, highly transparent appearance, pressure and crack resistance.

Inner bottle: PETG or PCTG, safe and non-toxic, suitable for all kinds of essence, cream and gel formulations.

Item	Capacity	Parameter	Material
DA12	5+5+5ml(no inner)	H90.7*D45.9mm
