PA187 Eco Airless Pump Packaging for Skincare & Cosmetics

Model	Capacity	Diameter	Height	Material
PA187	30ml	43mm	131mm	PP
PA187	50ml	43mm	171.7mm	PP

Why Choose PA187 Eco Airless Pump Bottle?

01
PP-Based Packaging Structure

PA187 is developed around a
PP-based packaging structure,
providing a material-focused alternative for brands exploring simplified cosmetic packaging solutions.

Compared with packaging structures that combine multiple material types, a PP-based approach can help

brands investigate more streamlined packaging designs and support their packaging sustainability strategy.

For brands developing
mono-material cosmetic packaging,
PA187 can be considered as part of a broader PP packaging system. Material composition and recyclability
should always be evaluated according to the final packaging configuration, components, local recycling
infrastructure and applicable regulations.

02
Airless Pump Dispensing

The airless system is designed to dispense the formula without requiring a traditional dip tube.
As the product is dispensed, the internal mechanism moves upward to help minimize the amount of air
introduced into the container.

This makes airless packaging particularly suitable for formulas where controlled dispensing and reduced air exposure are important considerations.

PA187 can therefore be used for a variety of skincare applications:

- Facial cream
- Moisturizer
- Serum
- Eye cream
- Lotion
- Treatment cream
- Anti-aging skincare
- Premium skincare formulations

03
Practical 30ml & 50ml Capacities

PA187 is available in two commonly used cosmetic packaging capacities:

Capacity	Typical Applications
30ml	Serums, eye creams, treatments, travel-size skincare
50ml	Face creams, moisturizers, premium skincare

The two capacity options allow brands to build coordinated product lines while maintaining
a consistent packaging appearance.

PA187 Eco Airless Pump Bottle

For skincare brands, choosing an airless bottle can involve considerations beyond visual appearance.

Feature	Eco Airless Pump Bottle
Airless dispensing	□
PP-based structure	□
30ml / 50ml options	□
Controlled dispensing	□
Suitable for skincare	□
Sustainability-oriented design	□
OEM/ODM customization	□

The final packaging selection should be based on formula compatibility, filling requirements, dispensing performance, regulatory requirements and the target market.

Why Work With a Cosmetic Packaging Supplier?

Selecting the right packaging manufacturer can simplify the development process from packaging selection to mass production.

Topfeelpack provides cosmetic packaging solutions for beauty brands, skincare companies and cosmetic manufacturers, supporting packaging development across different product categories.

Our capabilities can support:

Packaging Selection → Design Customization → Decoration → Sampling → Production → Quality Control → Delivery

This integrated approach helps brands reduce communication complexity and develop packaging more efficiently.

PRODUCT SIZE

There will be errors in manual measurement.
Please take the real object as the standard

Note: the unit of measurement is mm
